

CollPlant Biotechnologies

WE'RE HIRING!

Process Engineer Team Leader

CollPlant, located in Rehovot, Israel, is developing technologies in the fields of regenerative medicine, 3D bioprinting of tissues and organs and medical aesthetics. We are looking for a talented and highly motivated Process Engineer Team Leader to join us.

Responsibilities and Duties:

- Establish and lead the process engineering department:
 1. Develop and implement policies, standards and procedures for the engineering department.
 2. Coordinate and direct projects, making detailed plans to accomplish goals and directing the integration of technical activities
 3. Plan and formulate engineering program for operational growth
 4. Analyze and solve engineering-related problems
 5. Recruit the personnel to support the process development projects
- Lead the development and improvement of the sterile & non sterile manufacturing processes including:
 1. Project planning and management (timelines, coordination, resources)
 2. Preparation & review of supportive documentation (URS, design specifications, protocols, procedures, reports)
 3. Manage the sourcing of equipment, parts.
 4. Manage Equipment and Process validation activities and documentation
 5. Manage sub-contractors.

Qualifications & experience:

- Significant experience in the biopharmaceutical industry (preferably sterile manufacturing) in engineering/validation/operations.
- Experienced in small -medium companies, new team establishment & clean room construction projects.
- Mechanical/biotechnology/chemical engineer.
- 5-7 years' experience in the pharma or biotechnology industries
- Deep understanding of Quality assurance, ISO and GMP practices and documentation
- Fluent English and excellent English writing skills
- MS Project experience

Skills:

- Excellent leadership Skills
- High motivation, innovation and proactivity
