

CollPlant Biotechnologies WE'RE HIRING!

VP Research & Development

CollPlant Biotechnologies, located in Rehovot, Israel, is developing technologies and products in the field of regenerative medicine. We are looking for a talented and experienced VP Research & Development to join our executive management team. The VP Research & Development will report to the company's CEO.

Major Duties and Responsibilities

- Manage the R&D department.
- Lead development of regenerative medicine and medical aesthetics products, including execution of the development plan, meeting timelines and budget.
- Ensure a seamless transition of product candidates from R&D to operation.
- Work with the regulatory department to ensure products are developed in compliance with regulatory requirements.

Experience Requirements / Qualifications:

- PhD in Biotechnology/Biomedical/Material /Chemical Engineering.
- 8 – 10 years of biotech industry experience in product development under Design Controls from proof-of-concept, verification and validation activities through commercialization of Class III Implantable Devices and/or Combination Device/Biologics.
- Prior experience in regenerative medicine and biomaterials R&D activities including supporting regulatory submissions and up to product launches is a must.
- Prior experience in pre-clinical and clinical studies.
- Experience in working with cell lines, proteins and polymers.
- Experience with analytical development, including protein chemistry and biochemistry assays, spectroscopy, rheometry and mechanical analysis.
- Fluent English (scientific writing & speaking).

Managerial Skill Requirements / Qualifications:

- Ability to lead the development of project strategy and be accountable for project plans, timelines, progress, and outcomes.
- Experience in leading and motivating product development teams in a matrix environment.
- Ability to cultivate excellent cross-functional collaborations.
- Strong organizing and project management skills
- Ability to effectively communicate at multiple levels of the organization.
