

# CollPlant Biotechnologies

# WE'RE HIRING!

## Process Engineer

CollPlant Biotechnologies, located in Rehovot, Israel, is a NASDAQ-listed company developing technologies in the fields of regenerative medicine, 3D bioprinting of tissues and organs and medical aesthetics.

We are looking for a detail-oriented and highly motivated **Process Engineer**.

### Responsibilities and duties:

- Lead the development and implementation of the upstream protein purification process:  
Process improvements and optimization, Process yields, and Scale ups
- Identify potential risks and mitigations
- Manage and investigate process-related discrepancies and propose related CAPA
- Preparation of protocols, reports, change control documents
- Implement New Technologies & Equipment - Initiate and lead introduction of new assets, equipment and systems that will contribute to the business strategic direction, in accordance with approved change control procedures
- Equipment Qualification, Documentation & Change Control - Ensure that installations and changes to equipment and systems are carried out, qualified, and documented according to approved protocols, change control procedures and in compliance with relevant cGMP.
- Technology transfer from R&D to production including:  
Lyophilization process development and scale up  
Scale up of newly developed formulations  
Process validations (URS, VMP, protocols and reports)

### Required skills and qualifications:

- B.Sc. in biotechnology/ Chemical engineering/ other related Engineering fields with experience in biotechnology/pharma industries
- 5-8 years' experience in process engineering in pharma/Biotechnology/Food companies.
- Demonstrated experience in protein purification with hands on experience in pilot scale downstream and/or upstream processes
- Deep understanding in Quality assurance, regulations and GMP practices and documentation
- Excellent English including writing protocols and reports

### Personal Skills

- Excellent Project Management Skills: Planning, Prioritization & multi-tasking
- Ability to lead high level projects while deep diving into details
- Team player
- High motivation, innovation, and proactivity
- Details oriented

### Other

- Mobility between 3 sites (2 in the center, 1 in the north)
