

# CollPlant Biotechnologies

# WE'RE HIRING!

## Preclinical Manager

CollPlant Biotechnologies, located in Rehovot, Israel, is developing technologies in the fields of regenerative medicine, 3D bioprinting of tissues and organs and medical aesthetics.

We are looking for a talented and highly motivated Preclinical Manager to join our team.

### Responsibilities

- Develop and implement strategic plans for preclinical development, aligning with the overall development goals of the company. Identify key milestones, deliverables, and timelines.
- Design and oversee preclinical studies, including pharmacology, toxicology, and safety assessments, to evaluate the efficacy and safety of medical devices.
- Lead the in vitro studies by demonstrating background in biology and molecular biology including tissue culture systems, protein biochemistry immunoassays.
- Ensure compliance with relevant regulatory guidelines and requirements, such as Good Laboratory Practices (GLP) International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) guidelines and ISO (international organization for standards) standards.
- Analyze preclinical data, interpret results, and provide comprehensive reports to support decision-making.
- Select, lead, and manage ongoing communication with preclinical local and international Contract Research Organizations (CROs).

### Qualifications and requirements:

- Ph.D./MSc in Biology, DVM, in a relevant scientific discipline (e.g., pharmacology, toxicology, biochemistry) with a solid understanding of medical device/drug development processes.
- Minimum 5 years of industry experience in preclinical development within the pharmaceutical or medical device industry.
- Strong understanding of regulatory guidelines and requirements governing preclinical development (e.g., GLP, ICH, ISO).
