

CollPlant Biotechnologies

WE'RE HIRING!

R&D Manager Agriculture

CollPlant is a regenerative and aesthetic medicine company focused on 3D bioprinting of tissues and organs, and medical aesthetics. Our products are based on our rhCollagen (recombinant human collagen) that is produced with CollPlant's proprietary plant based genetic engineering technology.. We are looking for a talented and highly motivated Agricultural R&D Manager for our Northern site located nearby Rosh Pina.

Qualifications

- PhD in plant Sciences.
- Specialized in plant physiology, breeding (preferred crop plants).
- Hands-on experience in field studies for breeding (Industry) or related.
- Good knowledge and experience with data management and statistical analysis.
- Managerial experience- an advantage.
- Excellent technical English (speaking and document writing).
- Valid driving license (the position requires frequent visits to field sites).

Responsibilities and Duties

Lead program for yield and quality improvements including:

- Design of field studies to evaluate the impact of growing conditions and growing protocols on yield and quality of recombinant proteins.
- Execute studies- setup experimental plan, protocols follow up, data collection and analysis.
- Writing study protocols and reports.
- Manage breeding program.
- Collaborate and coordinate activities with relevant company functions.
- Manage sub-contractors.
- Independent project management (operation and budget).

Additional skills

- Strong self-motivation, organizational and time-management skills.
- High accountability.
- Excellent interpersonal skills.
- Ability to work in a fast-paced environment with a flexible work schedule.
